

Module 5 in-class Coding I

```
/**
 * Recursive Java program to calculate the sum of digits in a given number.
 */
public class SumOfDigits {
    /**
     * Recursive method to calculate the sum of digits.
     *
     * @param n The input number.
     * @return The sum of digits.
     */
    public static int sumOfDigits(int n) {
        // Base case
        // Recursive case
    }

    /**
     * Main method to test the sumOfDigits function.
     *
     * @param args Command line arguments (not used).
     */
    public static void main(String[] args) {
        // Input
        // Output
    }

    /**
```

- * Grading Rubric (Maximum 100 points):
- * - Correct implementation of base case and recursive case: 40 points
- * - Proper documentation (comments): 20 points
- * - Correctness of the main method and output: 20 points
- * - Code structure and formatting: 20 points
- */
- }

Points 100
