

Module 5 in-class Coding III

```
/**
 * Recursive Java program to check if a given string is a palindrome.
 */
public class Palindrome {
    /**
     * Recursive method to check if a string is a palindrome.
     *
     * @param str The input string.
     * @param start The starting index.
     * @param end The ending index.
     * @return True if the string is a palindrome, false otherwise.
     */
    public static boolean isPalindrome(String str, int start, int end) {
        // Base case
        // Recursive case
    }

    /**
     * Main method to test the isPalindrome function.
     *
     * @param args Command line arguments (not used).
     */
    public static void main(String[] args) {
        // Input
        // Output
    }
}
```

```
/**  
 * Grading Rubric (Maximum 100 points):  
 * - Correct implementation of base case and recursive case: 40 points  
 * - Proper documentation (comments): 20 points  
 * - Correctness of the main method and output: 20 points  
 * - Code structure and formatting: 20 points  
 */  
}
```

Points 100
