Question 1 pts

Which of the following is **not** a valid Java data type?

- ☐ real
- ☐ int
- ☐ float
- ☐ char

Question 1 pts

What is the default value of a in Java?

- ☐ false
- ☐ true
- ☐ 0
- ☐ null

Question 1 pts

In Java, which keyword is used to create an object?

- ☐ new
- ☐ create

- ☐ make
- ☐ object

Question 1 pts

Which of the following is a method to get input from a user in Java?

- ☐ Scanner.nextLine()
- ☐ System.in()
- ☐ Console.write()
- ☐ BufferedReader.write()

Question 1 pts

What is the output of the following code?

```
int x = 5;
```

```
System.out.println(++x);
```

- ☐ 6
- ☐ 4
- ☐ 5
- ☐ 7

Question 1 pts

Which of these access specifiers can allow access only within the same package?

- ☐ default (no modifier)
- ☐ private
- ☐ protected
- ☐ public

Question 1 pts

Which of the following is used to stop the execution of a loop?

- ☐ break

- ☐ exit
- ☐ stop
- ☐ terminate

Question 1 pts

What does the `final` keyword signify in Java?

- ☐ The variable cannot be changed
- ☐ The variable is mutable
- ☐ The method can be overridden
- ☐ The class can be extended

Question 1 pts

What is the size of an `int` in Java?

- ☐ 32 bits
- ☐ 8 bits
- ☐ 4 bits
- ☐ 16 bits

Question 1 pts

In Java, which of the following loops guarantees at least one iteration?

- ☐ do-while loop
- ☐ for loop
- ☐ while loop
- ☐ foreach loop

Question 1 pts

Which of the following is a valid way to declare an array in Java?

- ☐ `int[] arr = new int[10];`
- ☐ `array arr[10];`
- ☐ `int arr[10];`
- ☐ `new int arr[10];`

Question 1 pts

What is the primary purpose of the `static` keyword in Java?

- ☐ To associate a method or variable with the class, not the instance
- ☐ To define constants
- ☐ To prevent a method from being overridden
- ☐ To restrict visibility to the current package

Question 1 pts

What does JVM stand for?

- ☐ Java Virtual Machine
- ☐ Java Variable Machine
- ☐ Java Visual Manager
- ☐ Java Version Manager

Question 1 pts

What is the output of the following code?

```
String s1 = "Hello"; String
```

```
s2 = new String("Hello");
```

```
System.out.println(s1 == s2);
```

- ☐ false
- ☐ true
- ☐ Compilation Error
- ☐ null

Java Swing

Java Swing

Cancel

Update

Question 1 pts

Which of the following is the top-level container in Java Swing?

- ☐ JFrame
- ☐ JPanel
- ☐ JLabel
- ☐ JButton

Question 1 pts

What is the purpose of `JLabel` in Swing?

- ☐ To display a text label or image
- ☐ To create a button
- ☐ To handle events
- ☐ To create a text field

Question 1 pts

Which method is used to add components to a `JFrame`?

- ☐ add()
- ☐ addComponent()
- ☐ insert()
- ☐ attach()

Question 1 pts

Which layout manager arranges components in a grid format with a specified number of rows and columns?

- ☐ GridLayout
- ☐ BorderLayout
- ☐ FlowLayout
- ☐ CardLayout

Question 1 pts

In Swing, which class is used to create a button?

- ☐ JButton
- ☐ JLabel
- ☐ JRadioButton
- ☐ JToggleButton

Question 1 pts

What is the role of `ActionListener` in Java Swing?

- ☐ To handle action events such as button clicks
- ☐ To handle mouse events
- ☐ To handle keyboard input
- ☐ To layout components in a container

Question 1 pts

What does the `setVisible(true)` method do in Swing?

- ☐ It makes the window visible on the screen
- ☐ It closes the window
- ☐ It hides the window
- ☐ It maximizes the window

Question 1 pts

Which method is used to make a `JButton` respond to a click event?

- ☐ addActionListener()
- ☐ addClickListener()
- ☐ setActionListener()
- ☐ handleClick()

Question 1 pts

What is the function of `JTextField` in Swing?

- ☐ To allow user text input
- ☐ To create a button

- ☐ To create a menu
- ☐ To display a label

Question 1 pts

Which of the following is a correct way to close a `JFrame` when the user clicks the close button?

- ☐ `setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE)`
- ☐ `setVisible(false)`
- ☐ `close()`
- ☐ `dispose()`

Java Inheritance and Polymorphism

Java Inheritance and Polymorphi:

⚠ This question group is set to pick more questions than are available.

Question 1 pts

Which keyword is used in Java to inherit a class?

- ☐ `extends`
- ☐ `implement`
- ☐ `inherits`
- ☐ `derived`

Question 1 pts

Which of the following statements about inheritance is true?

- ☐ A subclass can override methods from its superclass
- ☐ A subclass cannot access the protected members of its superclass
- ☐ A subclass can inherit from multiple classes
- ☐ A subclass inherits private members from its superclass

Question 1 pts

Which method is used to call the parent class constructor in Java?

- ☐ `super()`
- ☐ `parent()`
- ☐ `base()`
- ☐ `init()`

Question 1 pts

What is the primary benefit of inheritance in Java?

- ☐ It promotes code reuse and method overriding
- ☐ It allows for code duplication
- ☐ It provides a way to define methods
- ☐ It allows a class to implement multiple interfaces

Question 1 pts

In which of the following cases will the `super()` keyword be used explicitly?

- ☐ To call the constructor of the parent class
- ☐ To call a static method of the parent class
- ☐ To access private members of the parent class
- ☐ To prevent method overriding

Question 1 pts

What is polymorphism in Java?

- ☐ The ability of objects to take on many forms
- ☐ A way to write multiple constructors
- ☐ A feature that enforces encapsulation
- ☐ A feature that prevents code reuse

Question 1 pts

What is method overriding in Java?

- ☐ Redefining a method in a subclass that already exists in the parent class
- ☐ Defining a method with the same name and parameter list in the same class

- ☐ Changing the return type of a method
- ☐ Defining multiple constructors in a class

Java MariaDB JDBC

Java MariaDB JDBC

ⓘ This question group is set to pick more questions than are available.

Question 1 pts

Which JDBC driver is used to connect Java applications with MariaDB?

- ☐ MariaDB JDBC driver
- ☐ ODBC driver
- ☐ Oracle JDBC driver
- ☐ MySQL JDBC driver

Question 1 pts

What is the correct URL format for connecting to a MariaDB database using JDBC?

- ☐ jdbc:mariadb://hostname:port/databaseName
- ☐ jdbc:mysql://hostname:port/databaseName
- ☐ jdbc:odbc://hostname:port/databaseName
- ☐ jdbc:oracle://hostname:port/databaseName

Question 1 pts

What method is used to establish a database connection in JDBC?

- ☐ getConnection()
- ☐ createConnection()
- ☐ connect()
- ☐ initConnection()

Question 1 pts

Which class in JDBC is used to send SQL queries to a database?

- ☐ Statement
- ☐ Connection
- ☐ ResultSet
- ☐ SQLQuery

Question 1 pts

How can you close a database connection in JDBC?

- ☐ connection.close()
- ☐ connection.stop()
- ☐ connection.terminate()
- ☐ connection.end()

Java Exception Control

Java Exception Control

Pick 6 questions, 2 pts per question Pick questions, pts per question

Cancel

Update

Question 1 pts

What is the purpose of the `try` block in Java?

- ☐ To define code that might generate exceptions
- ☐ To manually throw an exception
- ☐ To handle exceptions
- ☐ To catch exceptions

Question 1 pts

Which block must follow a `try` block in Java?

- ☐ catch

- ☐ finally
- ☐ throw
- ☐ None of the above

Question 1 pts

What is the result of the following code?

```
try {  
  
    int a = 5 / 0;  
  
} catch (ArithmeticException e) {  
  
    System.out.println("Error: Division by zero");  
  
}
```

- ☐ Prints "Error: Division by zero"
- ☐ Compilation error
- ☐ ArithmeticException thrown but not caught
- ☐ NullPointerException thrown

Question 1 pts

Which keyword is used to define a method that may throw an exception?

- ☐ throws
- ☐ throw
- ☐ exception
- ☐ try

Question 1 pts

What happens if an exception is not caught in Java?

- ☐ The program terminates immediately
- ☐ The program continues normally

- ☐ The program enters an infinite loop
- ☐ A warning is logged, and the program continues

Question 1 pts

What is the order of execution when a `try`, `catch`, and `finally` block are used?

- ☐ try -> catch -> finally
- ☐ finally -> try -> catch
- ☐ try -> finally -> catch
- ☐ catch -> try -> finally

Question 1 pts

Which of these methods is used to retrieve the message from an exception object?

- ☐ getMessage()
- ☐ printMessage()
- ☐ getCause()
- ☐ printStackTrace()

Question 1 pts

Which of the following exceptions is thrown when an attempt is made to divide a number by zero in Java?

- ☐ ArithmeticException
- ☐ IllegalArgumentException
- ☐ NumberFormatException
- ☐ IOException

Question 1 pts

What does the `printStackTrace()` method do in Java?

- ☐ It prints the details of the exception to the console, including the method call stack
- ☐ It returns the message of an exception
- ☐ It logs the error message in the system
- ☐ It suppresses the exception
