

Polymorphism - Method Overriding

```
class Animal {  
    public void makeSound() {  
        System.out.println("Some sound");  
    }  
}  
  
class Dog extends Animal {  
    @Override  
    public void makeSound() {  
        System.out.println("Woof!");  
    }  
}  
  
class Cat extends Animal {  
    @Override  
    public void makeSound() {  
        System.out.println("Meow!");  
    }  
  
    public static void main(String[] args) {  
        Animal myAnimal1 = new Dog();  
        Animal myAnimal2 = new Cat();  
  
        myAnimal1.makeSound(); // Output: Woof!  
        myAnimal2.makeSound(); // Output: Meow!
```
